

# SRI LANKAN JOURNAL OF APPLIED STATISTICS

Volume 9

2008

## SPECIAL ISSUE: International Statistics Conference

Operational Statistics for Improved Decision Making Policies: *L. Hansen, 1-15*

A Review of Some Developments of Multivariate Isotonic Regression: *D.D.S. Kulatunga, 17- 37*

A Longitudinal Model for Repeated Highly Skewed Outcome Data: *A.K. Manatunga, H. Chen, M.L. Terrell, R.H. Lyles, M. Marcus, 39-51*

Multiplicative Structural Models for Analysis of Genotype-Environment Interaction: *H. Sridhara, 53-73*

Construction and Selection of Conditional Double Sampling Plan Indexed Through Six Sigma Quality Levels: *R. Radhakrishnan and P.K. Sivakumaran, 74-83*

Estimation of Variance in Inverse Gaussian Distribution with Known Kurtosis: *A. Laheetharan and P. Wijekoon, 84-92*

Identifying Local Influence in Modified Ridge Regression Using Cook's Method: *A. Jahufer and C. Jianbao, 93-108*

Clustering of Large Data Sets Using Fuzzy Principal Component Analysis: *S. Sampath and V.S.Vaidyanathan, 109-120*

Day and Night, Electricity Load Forecasting for Peak Values in Sri Lanka: *T. M. J. A. Cooray and T. S.G. Peiris, 121-131*

Assessing Inefficiencies in Price Determination of Rice in Sri Lanka: Econometric Inverse Demand Model Approach: *D.P.M. Krishanthi, U. K.Jjayasinghe-Mudalige and T. D. Marawila, 133-144*

Economic Linkages of the Age Structural Changes in Population of Sri Lanka: *D.J. Jagoda and L.H.P. Gunaratne, 145-157*

Fitting Correlation Adjusted Generalized Linear Models to Clustered Dengue Data Measured Over Time: *H L.C. Perera and M.R. Sooriyarachchi, 159-175*

Instructions to Authors, 177
