

**INDEX OF THE
LITERATURE REPOSITORY ON
CKDu**

INDEX OF THE LITERATURE REPOSITORY ON CKDu 1998-2013

Title Index

1. The contribution of chronic kidney disease to the global burden of major non communicable diseases. p.7
2. World Health Organization (WHO) report on Chronic Kidney Disease of unknown etiology (CKDu) in Sri Lanka p.20
3. Chronic kidney disease of uncertain etiology of Sri Lanka p.23
4. Chronic renal failure in north central province of Sri Lanka :an environmentally induced disease p.34
5. Uncertain etiologies of proteinuric- chronic kidney disease in rural Sri Lanka p.39
6. Increasing number of cases of urolithiasis of unknown origin in Thanamalwila and Lunugamwehera: could it be due to the same aetiology of CKDu p.49
7. Socioeconomic impact of CKDu : A preliminary analysis p.50
8. Is bio-terrorism the cause of Rajarata kidney disease? p.51
9. Collated results of research bring new hope of ridding deadly scourge: chronic kidney disease affecting NCP rice farmers p.55
10. Report on chronic kidney disease North Central Province ,Sri Lanka p.60
11. Research programme for Chronic Kidney Disease of unknown aetiology in Sri Lanka p.65
12. A preliminary report on chronic kidney disease of unknown aetiology – Sri Lanka p.69
13. Chronic kidney disease of unknown aetiology (CKDu) a new threat to health p.75
14. Chronic kidney disease of unknown etiology in the north central province of Sri Lanka : trying to unravel the mystery p.86
15. Chronic kidney disease of Unknown Aetiology (CKDu) National research programme p.90
16. A double blind clinical trial to examine the renal effects of Angiotensin converting enzyme inhibitor(Enalapril) in adults with chronic kidney disease of uncertain aetiology (CKDu) p.98
17. Chronic kidney disease of unknown etiology: The discourse, lay perception, behavior and coping mechanisms p.100

20. Graphite furnace based(gfaas) method is more appropriate than hydrate generator based (hgaas) method in using atomic absorption spectrometry to detect arsenic in hardwater collected from aquifers on CKDu endemic areas in Sri Lanka
p.196
21. Hardness and presence of arsenic in aquifers of selected CKDu prevalent and other areas in Sri Lanka
p.197
22. Preliminary investigations on presence or Arsenic in soils and plants from two CKDu prevalent areas in Sri Lanka
p.197
23. Arsenic, Cadmium or people?
p.198
24. Chronic Kidney Disease of unknown etiology (CKDu) and Arsenic poisoning due to Illegal pesticides
p.201
25. Agrochemicals and NCP kidney disease – the reality
p.216
26. Chronic renal failure in NCP and Arsenic : Science versus myth
p.218
27. Chronic kidney disease of unknown etiology in Sri Lanka : is cadmium a likely cause?
p.222
28. Chronic renal failure among farm families in cascade irrigation systems in Sri Lanka associated with elevated dietary cadmium levels in rice and freshwater fish (tilapia)
p.229
29. Remediation of cadmium contaminated irrigation and drinking water: A large scale approach
p.243
30. Chronic renal failure in Sri Lanka caused by elevated dietary cadmium : trojan horse of the green revolution
p.247
31. Pollution of river Mahaweli and farmlands under irrigation by cadmium from agricultural inputs leading to a chronic renal failure epidemic among farmers in NCP, Sri Lanka
p.254
32. Tubulointerstitial damage as the major pathological lesion in endemic chronic kidney disease among farmers in North Central Province of Sri Lanka
P.270
33. Renal tubular functions of farmers of high prevalence area for CKDu
p.279
34. Correlation between the ultrasound scan appearance of renal parenchyma and kidney length with serum creatinine levels in chronic kidney disease of unknown origin
p.280
35. Endemic chronic kidney disease of unknown aetiology of Sri Lanka ;histopathological changes in kidneys of asymptomatic patients
p.281
36. Special kind of pigmentation in palms and soles of inhabitants of padavisripura –A CKDu endemic region in Sri Lanka
p.281

37. Evidence of tubular damage in the very early stage of chronic kidney disease of uncertain etiology in the North Central Province of Sri Lanka : a cross sectional study p.282
38. Urinary beta 2 microglobulin variation between chronic kidney disease patients of unknown etiology and non affected controls p.291
39. Cyanobacterial toxins : a hidden health hazard p.293
40. Could Ochratoxin A in food commordities be the cause of chronic kidney disease in Sri Lanka? p.296
41. Mycotoxin detection in urine samples from patients with chronic kidney disease of uncertain etiology in Sri Lanka p.299
42. Chronic kidney disease of unknown etiology (CKDu) :Is it cyanotoxins p.304
43. Identification ,extraction and analysis of cyanobacterial toxins in Kalawewa and Nachchaduwa fresh water tanks of Sri Lanka p.306
44. Dose dependent Na and Ca in fluoride –rich drinking water – another major cause of chronic renal failure in tropical arid regions p.307
45. The short term effect of cyanobacterial toxin extracts on mice kidney p.312
46. Effect of concentrated water from reservoirs of high prevalence area for CKD of unknown origin in Sri Lanka on mice p.316
47. The roles of environmental toxins in the pathogenesis of chronic kidney disease of unknown origin in Sri Lanka p.319
48. Tank water causes kidney disease p.324
49. Provision of safe drinking water as a strategy for mitigation of chronic kidney disease in Sri Lanka p.325
50. Natural radionuclides and trace elements in rice field soils in relation to fertilizer application : study of a chronic kidney disease area in Sri Lanka p.333
